Important steps to assure the most accurate measurement

1. Before printing this ring sizing guide, make sure that page scaling is set to "NONE" in your printer settings area.
2. Measure the line on the left to ensure it is exactly 2 inches.
3. If the measurement isn't accurate, please review your print settings again. Be sure you are printing full size.

This printout is provided to help you get a feel for the width of the ring you would like to make. The bars shown below are meant to be cutout and wrapped around your finger; they are labeled from 10 millimeters to 3 millimeters.

For accurate results, please cut along the outside of the line.
